### 10.5 Incompatible materials

No information available.

### 10.6 Hazardous decomposition products

Thermal decomposition can lead to the escape of irritating gases and vapours. Exothermal decomposition with formation of: Carbon dioxide. Carbon monoxide. Nitrogen oxides (NOx). carbon black.

## SECTION 11: Toxicological information

There are no data available on the preparation/mixture itself. Classification according to Regulation (EC) No. 1272/2008 [CLP] See Sections 2 and 3 for details.

### 11.1 Information on toxicological effects

Exposure to component solvents vapours concentration in excess of the stated occupational exposure limit may result in adverse health effects such as mucous membrane and respiratory system irritation and adverse effects on kidney, liver and central nervous system. Symptoms and signs include headache, dizziness, fatigue, muscular weakness, drowsiness and in extreme cases, loss of consciousness. Repeated or prolonged contact with the mixture may cause removal of natural fat from the skin resulting in non-allergic contact dermatitis and absorption through the skin. The liquid splashed in the eyes may cause irritation and reversible damage. Ingestion may cause nausea, diarrhoea and vomiting. This takes into account, where known, delayed and immediate effects and also chronic effects of components from short-term and long-term exposure by oral, inhalation and dermal routes of exposure and eye contact.

#### Acute effects

Acute toxicity No information available.

#### Irritant and corrosive effects

#### Sensitisation

Respiratory or skin sensitisation No information available.

#### CMR effects (carcinogenicity, mutagenicity and toxicity for reproduction)

##### Carcinogenicity

No information available.

##### Germ cell mutagenicity
